

OUR NETWORK

Kruger Products boasts the largest combined capacity for the production of facial tissue, bathroom tissue, paper towels and napkins in Canada, accounting for approximately 350,000 metric tonnes or 44%⁽¹⁾ of the country's annual production.

In North America, the Company operates nine FSC® COC-certified (FSC® C-104904) production facilities with a total annual production capacity of approximately 460,000 metric tonnes. Given inflationary pressure, the proximity of our Canadian and U.S. plants to customers and logistics providers leaves us with a marked competitive advantage.

1 PAPERMAKING & CONVERTING NEW WESTMINSTER, BC
